ABOUT ME

Accomplished **QA Manager / Senior QC Lead** with **14+ years of experience** driving quality assurance across large-scale web, mobile, API, and gaming platforms. Expert in **QA Strategy**, **Risk Management**, **Client Management**, and end-to-end **Delivery** for high-stake US & EU markets.

QA Leadership & Strategy

Proven track record of managing QA operations for cross-functional engineering groups, optimizing testing workflows, and ensuring 100% on-time release readiness.

Technical Execution

Strong hands-on capability in manual exploratory testing, API/Integration testing, and building functional automation test suites.

Client & Team Management

Direct technical point-of-contact for US/EU stakeholders; successfully mentored and upgraded skills for junior QCs to boost overall delivery performance.

KEY ACHIEVEMENT

Good Tester of the Year Award

LogiGear. Top recognition for exceptional bug discovery, leadership, and project execution quality.

14+

YEARS IN QA

LANGUAGE SKILLS

Vietnamese · Native

English · Professional Working Proficiency

CORE COMPETENCIES

QA Leadership

- QA Strategy & Planning
- Risk-based Testing
- Estimation & Resource Planning
- Defect Management
- Release Readiness
- Team Leadership & Mentoring
- Client Communication

Testing Capabilities

- Functional / Regression / Exploratory
- API & Integration Testing
- Performance Testing
- Accessibility Testing
- Cross-platform (Web, Mobile, Desktop)

Automation Frameworks

- Selenium (Java / C#)
- TestSigma
- Robot Framework
- TestArchitect

Tools & Technologies

- Postman / Swagger / JMeter
- Jira / Zephyr Scale / TestLink
- MS SQL / MySQL
- Agile/Scrum & Waterfall

WORK EXPERIENCE

APERIA VIETNAM (DA NANG BRANCH)

March 2020 – February 2025

Senior QC / QA Lead

Epay · FinTech Payment Platform

- Spearheaded QA planning and estimation for multi-disciplinary product streams, optimizing test allocation to achieve on-time releases.
- Conducted targeted technical training and mentorship for junior QCs, raising team productivity and reducing test execution turnaround time.
- Structured defect lifecycle tracking using Zephyr Scale and Jira to maintain transparent quality metrics for US stakeholders.

Tapestri · Pharmacy & Data Management Platform

- Led QA strategy and execution for a **16 to 18-member** multi-disciplinary team, defining clear quality benchmarks and comprehensive test coverage goals.
- Collaborated closely with Product Owners and BAs to translate complex pharmacy and data workflow requirements into detailed test suites and regression packs.
- Managed release readiness reviews and sanity testing, ensuring high platform stability and seamless production deployments.

CommerceHub · POS-based Payment Systems, US Client

- Contributed as a Senior QC core member within a **178-member** engineering organization (30 QCs, 132 Devs, 16 BAs) supporting critical US-based gas station payment platforms.
- Executed comprehensive API and integration testing using JMeter and Swagger, ensuring **0 critical payment integration defects** on release.
- Defined API test scenarios to validate backend transactions across complex hardware-software configurations.

DWARVES FOUNDATION – BETTER ENGINEERING

October 2018 – March 2020

QC Lead / QC Manager

Voconic & Urbox · DevOps Cloud & E-Commerce, EU & Malaysia Clients

- Served as the primary technical liaison for EU/Malaysia clients; established daily release readiness criteria and status reporting channels.
- Designed and deployed functional web automation test suites using **Selenium** and **TestSigma**, accelerating regression cycles.
- Prioritized testing backlogs and managed resource scheduling for parallel project sprints.

Be & Aharooms · Ride-Hailing & Hospitality Platforms

- Oversaw functional and exploratory testing for high-traffic mobile and web applications serving thousands of daily active users in Vietnam.
- Partnered directly with Product Owners (PO) and UI/UX designers to refine requirements early, reducing post-development design churn.

APERIA VIETNAM (DA NANG BRANCH)

March 2016 – April 2018

Senior QC / Automation Test Engineer

Alice & Ignite · Banking Systems

- Managed complex manual test execution within **48 to 80-member enterprise development groups**.
- Handled the project's most complex domain scenarios, ensuring strict regulatory compliance and functionality for banking applications.

R&D Automation Framework

- Architected and maintained an internal automated UI testing framework using **C#** and **Selenium WebDriver** in Eclipse.

LOGIGEAR (DA NANG BRANCH)

February 2011 – March 2016

Test Engineer / Team Lead

EBSCO · Global Digital Library Systems

- Led a **10-member testing team** covering cross-platform, multi-browser, and accessibility testing for large-scale library platforms.
- Worked directly with US client managers to align test objectives, manage risks, and resolve critical project bottlenecks.

Evernote & LeapFrog · Desktop, Mobile & Gaming Software

- Built functional automated test scripts using **TestArchitect** for Evernote desktop releases.
- Directed device-level game testing for proprietary hardware, ensuring stable frame rates and zero blocking issues upon launch.
